

WORLD HAPPENINGS
BRIEFLY TOLD

The Queen donated a £10 (£45) prize in Burlington, Canada, to help to encourage home food growing.

Canada plans to supply the United Kingdom with 40,000,000 dozen eggs in the present year under contracts now in existence.

Thousands of Belgians, unable to obtain proper food, died of starvation during the winter, according to a Belgian newspaper who escaped to Britain.

A banana brought by a seaman from Freshford, Sierra Leone, was sold at the Midlandway, Reg. Dist. Warship Work Committee for the equivalent of \$10.

Due to the wider differential in Russian rail gauge, oil transported to the German's Russian front in tank cars must be transferred at the oil border to Russian-gauge cars.

Nearly 10,000 Jews will be among 65,000 workmen called upon to build railways around oil fields in the Soviet Union.

Four hundred rare Mongolian and Tibetan manuscripts have been discovered by an expedition sent by the British Museum State Institute of Language, Literature and Art.

Education Minister Perry said there is a shortage of 75 qualified rural school teachers in British Columbia and by September this number is expected to reach between 140 and 150.

Lending A Hand

Thousands of British youths on their way to the front.

In the active civil defence of Britain, thousands of the nation's youth are playing a vital part. Liverpool, her port of the northwest, has 2,000 fully armed boys who go to active duty each night to man their posts throughout the city. There are similar organizations in half a dozen other great cities and in every township in the country. A.P. men are on night duty ready to play their part in keeping the communications open throughout the heaviest blitz. Many have already received decorations for gallantry. In the agricultural areas, too, youth service farms and forestry squads are making their contributions to the war effort in a dozen different ways. Mobilized for victory, the youth of Britain will not fail—Bullington from the New York.

Mode For Larger Figures
By ANNE ADAMS

Headquarters is a dingy building, coldly winter and hot in summer, although individual offices are furnished satisfactorily. It was a good school until the pupils were excommunicated to the country. Canadians from almost every district of the Dominion are there, although officials are meticulous about disclosing names.

Many Canadians joined the R.M.C. to be near husbands or sweethearts posted in the Canadian forces, and at the same time contribute to the war effort.

There are more than 2,000 women in the two-year-old organization. All are under 30 years of age, and must have a guaranteed personal income. They join for a year and can be renewed for another.

"We can't get over the Canadian girls' saving all this way (taking a hazardous ocean trip and paying all their expenses to share dangers in Britain) with us," the official said. "It's wonderful of them."

SUMMER SPORT SAFE

Children will get no hitting any more at an ocean case this year.

The war won't touch this hot weather playground—at least, it won't cut down it. The daily papers board has "frases" in cream, which means there will be as much as ever—but no more.

Children will get no hitting any more at an ocean case this year.

DOING WITHOUT THINGS

The fact of the matter is that we

The fact of the matter is that we

The fact of the matter is that we

A Summer Post

To Protect Shrubs And Gardens

The advent of spring marks a wide extension of the social amenities of cats and dogs, as lovers of gardens and flowers can readily testify. No self-respecting gardener, however, can afford to neglect his shrubs and flowers in his neighborhood, and as for cats, the garden provides a natural and pleasant resting place. However, the garden provides a natural and pleasant resting place. However, the garden provides a natural and pleasant resting place. However, the garden provides a natural and pleasant resting place.

NEW HEALTH BRAD

Gardening

Not Too Deep

One of the common mistakes of the beginner in planting seeds too deeply. Authorities recommend as a general rule, to sow seeds to a depth of four times the diameter of the seed. For example, if the seed is 1/4 inch in diameter, it should be sown 1/2 inch deep. This rule applies to all seeds, but some seeds, such as beans and corn, will be covered with soil. In such cases, the soil should be kept moist and the seeds should be covered with a thin layer of soil. This will help the seeds to germinate and grow.

Information

Most gardeners are advised to follow the clump planting for flowers and shrubs. This is a method of planting in which the plants are placed in a clump, rather than in rows. This method is particularly useful for plants that have a spreading habit, such as shrubs and flowers. It allows the plants to grow together and form a clump, which is more attractive than rows of plants. This method is also useful for plants that have a deep root system, as it allows the roots to spread out and form a clump.

In both flower and vegetable gardens, it is important to keep the soil moist and the plants well watered. This is especially true in the summer months, when the weather is hot and the soil is dry. It is also important to keep the plants well fertilized, as this will help them to grow and produce. Finally, it is important to keep the plants well pruned, as this will help them to maintain their shape and appearance.

Transplanting

Success with transplanting can be secured by waiting for the plants to be in a state of dormancy. This is a period of time when the plants are not growing and are therefore more susceptible to transplanting. It is also important to choose the right time to transplant, as this will affect the success of the transplant. Finally, it is important to use the right technique for transplanting, as this will also affect the success of the transplant.

Non-Invasive Methods

Non-Invasive Methods, minister of pensions and national health, displays the new "Canada Approved Vitamin B White Bread" developed by Dr. L. H. Newman, Dominion cerealist. After years of research, "The new white bread contains four times as much vitamin B as the standard white bread. It was developed to cause 90 per cent of Canadians could not or did not eat whole wheat bread.

Slow In Peace Time

Ordinary Freighters Take Weeks To Come From East Indies

It takes single trips of one or three months for ships to come from the East Indies. This is due to the long distance and the slow speed of the ships. It is also due to the fact that the ships are often delayed by bad weather and other factors. This means that it can take a long time for goods to be transported from the East Indies to other parts of the world.

The order has no effect of gift shipment to civilians overseas. These goods must not exceed five pounds in weight and must not contain more than two pounds of any one food.

Could Manage Easily

Customers In English Restaurants May Be Allowed Less Cuts

One rule, one rate. There may be all you are allowed for cuts made in England if Lord Woolton agrees with a scheme which would allow of Parvarey of Light Refrainments to be made in restaurants.

It is pointed out that this would save waiting-up, long time and service—obviously a considerable sum when more than 100,000 meals a week are served. French restaurants for years have had to manage with one knife and fork per meal—and have very lately, says the Association, Customer wipe the cutlery clean on a piece of towel and use for all courses.

REALLY WINDY THING

City of Albany Bill—More than 100,000

Albany—New Hampshire—stationed about the wind has blown 21 miles an hour and that 75 miles an hour—hurricane velocity is usual every day out of every time. Temperatures down to 56 degrees below have been recorded there frequently last winter in an all-time low of 70 removed.

The hottest weather ever recorded was 136 degrees Fahrenheit at Asina, Peru, Sept. 12, 1937.

Soldier Brothers Meet in London

The British Broadcasting Corporation

Essentially a ship-war deviler, the broadcasted word, comes to the surface to satisfy its weakness for news. "You can really play!" "You love to have that said of you!" "You can, you know, teach yourself to play with a card." "You don't have to be talented." "The card game matches the main part of your keyboard and also pictures a staff of music. It is a game right next the key to correspondence."

LATEST NAVAL CLASS

The largest naval class to graduate from H.M.C.S. King George VI.

26 naval sub-lieutenants received their commissions recently in a ceremony at the naval training camp at Halifax. The class included prominent sub-lieutenants from virtually every one of whom passed.

Aluminum is made from bauxite ore.

If your garage floor has become covered with grease, give it a good scrubbing. Remember that it is made of rubber, and if your tires rest in the grease day after day there is certain to be a slithering.
